<i>Please attach a copy of your invoice to this form and retain a copy for your records.</i>	

## Important Information

Turbochargers sent to be upgraded must be in good working order and free from damage, any turbochargers sent with damage may incur extra charges.

Pack any turbocharger individually and extremely well to avoid transit damage, double boxing is recommended. We also recommend adding double shipping labels to the outside of your package and place one inside to ensure your package does not become lost.

All turbochargers sent for upgrade must be have a valid order number and this form inside the package. If no form nor order number is present upon delivery of the package this will cause delays in upgrading or even extra fees.

We recommend delivery companies DHL, DPD and UPS. Please send using Express Service ONLY. Using other carriers or non express will likely cause delays and possible extra fees.

## Countries outside of the EU

If you sent goods to The Turbo Engineers GmbH from outside the European Union make sure that:

1. You sent the goods with a courier service like UPS, TNT or DHL Express etc.
2. Please attach a decent invoice and 3 copies at the outside of the box. The invoices must be visible for customs to declare the value. Please declare a reasonable value!

Please understand that we are not able to pick up any goods from our local customs office ourselves. They will be returned. All goods that are sent with local post services or don't have a decent declaration of value (invoice) will be delivered to our local customs. We are not able to pick this up.

TTEGlobal, TheTurboEngineers will not be held responsible for any lost or damaged items due to poor packaging.
